ALEX MORGAN

Senior Full-Stack & Distributed Systems Engineer | alex.morgan@hireupp.io

---

PROFESSIONAL SUMMARY

Senior Software Engineer with 4.5+ years experience building distributed backends and high-volume APIs. Expert in TypeScript, Node.js, Python, PostgreSQL, Docker, Redis, and Amazon Web Services (AWS).

WORK EXPERIENCE

Staff Senior Software Engineer | CloudScale Systems (2022 - Present)

- Architected and deployed 6 microservices on AWS ECS, reducing p99 response times by 38% for 450K DAU.
- Optimized database indexing and PostgreSQL query plans, decreasing query latency by 42%.
- Implemented Redis distributed caching layer handling 15,000 requests per second with 99.99% availability.

Software Engineer | NextGen Technologies (2020 - 2022)

- Built REST and GraphQL endpoints in Node.js and TypeScript, supporting cross-platform web and mobile clients.
- Designed automated CI/CD pipeline in Docker and GitHub Actions, cutting release cycles from 3 days to 4 hours.

EDUCATION

Bachelor of Technology in Computer Science & Engineering | University Institute of Technology (2016 - 2020)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Go
Backend & Web: Node.js, Express, FastAPI, React, Next.js, GraphQL, REST APIs
Database & Cloud: PostgreSQL, Redis, MongoDB, AWS S3, AWS ECS, Docker, CI/CD, Git
Methodologies: Distributed Systems, System Design, Microservices, Unit Testing, Agile
